EJERCICIO DE INGLÉS

Smartphone Myths

In the past, people used mobile phones to make calls, send short text messages and maybe to play a simple game. Today, we can browse webpages, check the weather, make video calls and watch TV on our phones.

5 There are nearly four billion smartphone users worldwide and this number is growing every year. But, in reality, many people don't know very much about their smartphones even though they use them all the time. What's more, many things we believe about smartphones are actually myths.

MYTH: If you charge your phone battery a lot, it will damage your phone.

10 **FACT:** Maybe this was true with older phones, but smartphone technology is much better today. Your phone is clever because it will automatically stop charging the battery when the phone is charged. So, you can plug in your charger and recharge your phone overnight and it won't damage your phone.

MYTH: You will save your battery if you shut down the apps on your phone.

15 **FACT:** Many people think that when a lot of apps are running on your phone, your device is using up more power. But actually, smartphones have got special algorithms. They automatically close apps when they aren't used. They also refresh apps when it is needed and limit apps when they use up too much power. In fact, when you open and close apps manually, you are actually wasting more power.

MYTH: Free Wi-Fi is safe to use.

20 **FACT:** Yes, free Wi-Fi is very useful when you aren't at home or if you're travelling abroad. But free Wi-Fi networks are open networks and they haven't got the same level of security as your Wi-Fi at home. This makes it easier for hackers to access people's information on these networks. It's best not to use public Wi-Fi, but if you have to use these networks, you can use a VPN (virtual private network) as this creates a more secure connection to the Internet.

MYTH: You can use a hairdryer or rice to dry a wet phone.

25 **FACT:** Around 39% of people have dropped their phone in water and 26% of people have dropped their phone in the toilet! There are different ways to try and fix a wet smartphone – but many of them don't work. Some people believe you should put a wet phone in a bowl of uncooked rice. Rice absorbs a lot of water, so that's why people think this is a good idea. But experts say it doesn't help. Experts also believe using a hairdryer to dry a phone is bad. Even though it dries the phone, it can also overheat the phone and this causes damage as well. According to experts, you should shake your phone so the
30 water comes out and then leave it to dry naturally.

CRITERIOS DE EVALUACIÓN Y CALIFICACIÓN

Criterios de calificación: El examen se califica sobre un total de **10 puntos**. La puntuación parcial de cada una de las preguntas figura ente paréntesis al lado de cada enunciado.

Pregunta 1 (1 punto)

La respuesta debe ser la palabra o expresión precisa y equivalente al cien por cien con la definición que se da. A cada respuesta correcta se le otorgarán 0,25 puntos.

Pregunta 2 (2 puntos)

La respuesta correcta consiste en expresar la información que aparece en el texto Se valorará tanto el aspecto formal como la adecuación de cada respuesta a la cuestión formulada. Se otorgará un punto a cada respuesta correcta. Si la reproducción es parcial se otorgará medio punto por frase. Se podrá descontar 0,25 por errores gramaticales.

Pregunta 3 (2 puntos)

La respuesta correcta consiste en indicar si la afirmación es **TRUE (T) o FALSE(F)** y en justificar la elección citando del texto, reproduciendo las palabras textuales entre comillas, aportando toda la información relevante sin excederse.

Se otorgará 1 punto a cada frase, siempre que tanto la denotación de Verdadero o Falso como su justificación sean correctas. En el caso de que la justificación sea excesiva o escasa, se podrá otorgar 0.5 por frase. No puntuaran aquellas respuestas en las que la denotación de Verdadero o Falso sea incorrecta.

Pregunta 4 (1 punto)

La respuesta correcta consiste en indicar cuál de las tres es la verdadera.

Pregunta 5 (4 puntos)

Se observará, en primer lugar, que el aspirante se atiene en su escrito al tema y extensión propuestos y se valorará su capacidad comunicativa en inglés, el uso correcto de las estructuras gramaticales (se penalizarán los errores ortográficos y la falta de coherencia sintáctica), el vocabulario adecuado y preciso (se penalizarán los usos impropios e imprecisos de las palabras) y el orden y coherencia en la exposición, el uso de párrafos, la creatividad.

Se observará la siguiente puntuación a la hora de calificar la redacción:

- Contenido y vocabulario:1.
- Organización y estructura. Cohesión y coherencia: 1.
- Corrección ortográfica, morfológica y sintáctica: 1.
- Capacidad comunicativa: 1
